Project Acknowledge

As we understand that the eProject is a step-by- step learning environment that closely simulates the classroom and Lab based learning environment into actual implementation. It is a project implementation at your fingertips!! An electronic, live juncture on the machine that allows you to:

- Practice step by step i.e. ladder approach.
- Build a larger more robust application.
- Usage of certain utilities in applications designed by user.
- Single program to unified code leading to a complete application.
- Learn implementation of concepts in a phased manner.
- Enhance skills and add value.
- Work on real life projects.
- Give a real life scenario and help to create applications more complicated and useful.
- Mentoring through email support.

Project Objectives

The Objective of this program we aim is to give a sample project to work on real life projects. These applications help us build a larger more robust application.

The objective is not to teach us JavaScript/Dreamweaver but to provide us with a real life scenario and help us create basic applications using the tools. Hence, we can revise the chapters before we start with the project. This project is meant for students like us who have completed the module of HTML5. These programs should be done in the Lab sessions with assistance of the faculty if required.

It is very essential for us that will have a clear understanding of the subject. We think we should go through the project and solve the assignments as per requirements given.

And get back @ eprojects@aptech.ac.in as the assigned schedule.

Synopsis

Liberty Electronics is a shop selling various electronic products. The company advertises by distributing the pamphlets, advertising on television and so on. Due to rapid development in internet field, the company decides to launch a website where people will get all the information about the various products available with them easily.

The website is to be developed for the Windows Platform using HTML5, JavaScript and Geolocation. The site should work well in all leading browsers including Chrome, IE, Firefox etc

Design Plan: Liberty Electronics	Document Name: Problem Definition	SWD/Form No.01/PD/Ver1.0
Effective Date: 15/11/2020	Version 1.0	Page No: 1 of 25

Problem Definition

As mentioned above, Liberty Electronics is a shop which sells various electronic products. Wanted to expand its name, the shop decided to make a website to contain and show all the latest information of their products to their customers easily.

The website is to be developed for the Windows Platform using HTML5, JavaScript and Geolocation. The site should work well in all leading browsers including Chrome, IE, Firefox etc.

Design Plan: Liberty Electronics	Document Name: Problem Definition	SWD/Form No.01/PD/Ver1.0
Effective Date: 15/11/2020	Version 1.0	Page No: 2 of 25

Requirement Specification:

The Web site is to be created based on the following requirements:

1. The Home Page should be created making use of sections with a suitable logo
2. The site should display a menu which will contain the options for brief introduction about the various products available, location of the shop and any other information if required.
3. The information should be categorized according to the brand names of the products like if a User wants to see only Samsung products then he click on a Link/button/menu etc and he will see only That Brand products.
4. When a user selects any particular brand, a list of products for that brand will be displayed
5. A brief summary of features of individual products should be displayed on the Web Page along with the product but detailed Features should be stored in Individual Word documents which can be downloaded or viewed by the User who wishes to see the same.
6. The user should also be able to compare the various products of different as well as similar brands.
7. There should be a “Contact Us” page which will have the Address of the Company which is as follows and the mail address which when clicked will invoke the local mail client from where they can send an email. Address of the Company should be displayed using GeoLocation API (eg. GoogleMaps).

USER

- Register an account for membership which includes discounts, etc (optional)
- Access and refer to the information placed on the website.
- Contribute ideas, feedback or suggestions to the club.

WEBMASTER

- Make sure the website has enough information for the customers.
- Change the content, images and layout of the website.
- Manage interactive user information to website.

USER

Input:

- Required information for registering an account
- Required information for delivery

Process:

- Search/refer products
- Log in to check delivery status, events, etc in registered account
- Check/edit the information provided to the shop

Output: (users will receive the following notifications)

- Successful registration notice
- Notice of successful information change
- Notification of the delivery status
- Notice of registration / change of information failed

Effective Date: 15/11/2020	Version 1.0	Page No: 5 of 25

WEBMASTER

Input:

- Login information to administer the website
- Information to change / add or delete: Updates on price changes, news of new products, articles that change seasonally...
- Deletion of membership information that is no longer part of the club
- Get feedback and reviews from user

Process:

- Change / add / remove products
- Change / add / remove delivery status, events, etc
- Reply / delete comments from users

Output: (the website manager will place the following message)

- Successful registration / change / deletion of member account information or failure.
- Respond to success / failure suggestions

HARDWARE/SOFTWARE REQUIREMENT

Hardware

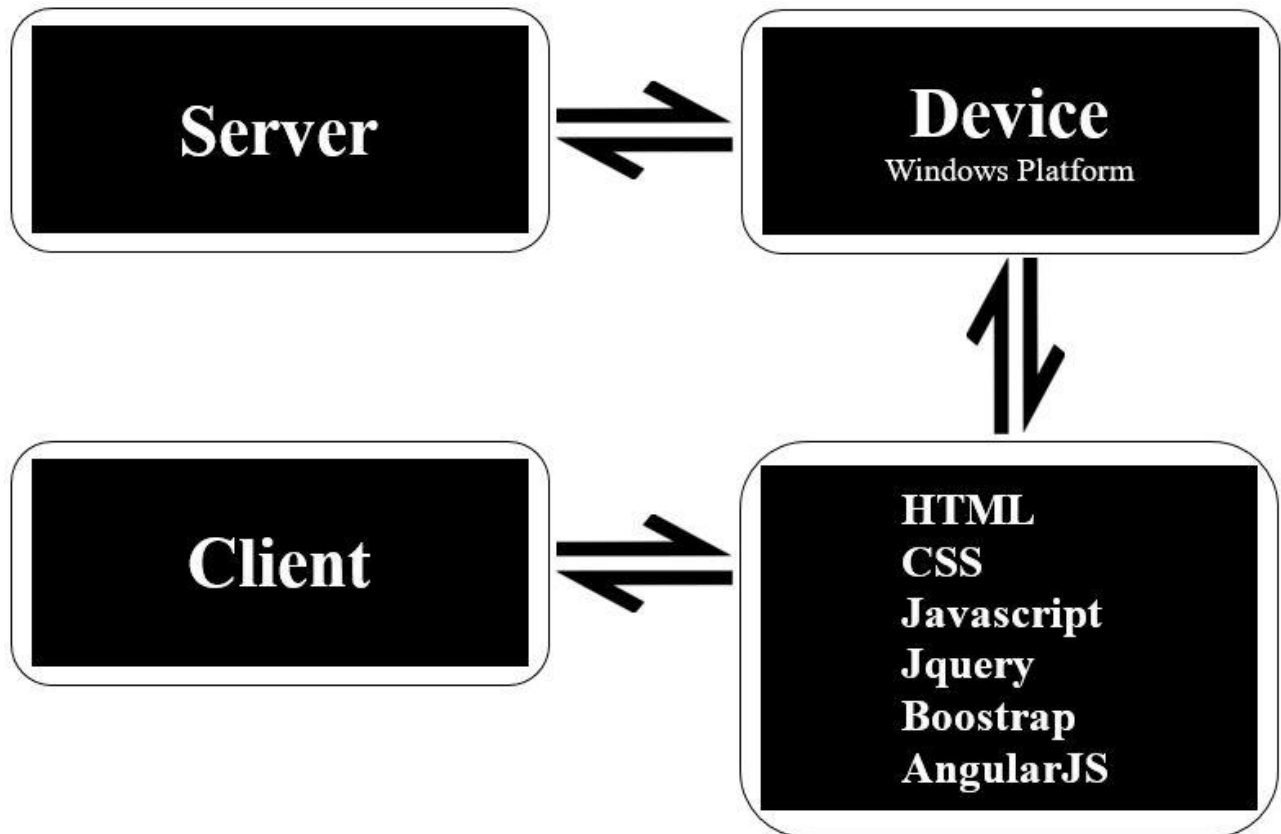

- A minimum computer system that will help you access all the tools in the courses is a Pentium 166 or better
- 64 Megabytes of RAM or better
-

Software

- Notepad/HTML editor
- Dreamweaver
- IE 5.0/ Netscape 6.0

iPhone 12 Pro

iPhone 12 Pro Max

iPhone 12

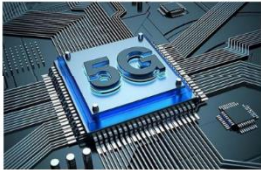

[iPhone models](#)

Apple launched four new lines of iPhone, with sleek, eye-catching designs and more outstanding features. It can be seen, if this year Apple changes the design, uses OLED screens on all product lines as well as refines the size of the notch on the front, equipped with 3D LIDAR sensors. To help remove fonts as well as bring about a better virtual reality experience, the iPhone 12 series is indeed the line of devices that we should look forward to.
